

The Works of Mary Midgley

Compiled by Ian James Kidd

to ian.kidd@nottingham.ac.uk

It is a sobering experience to compile the writings of Mary Midgley, for two reasons. The first is the sheer quantity of her writings: over two hundred and eighty items are detailed below. The second is the diversity of her outputs. Alongside her single and co-authored books and edited books, there are articles and essays for philosophy journals, scientific periodicals, newspapers, popular environmental and intellectual magazines, as well as pamphlets, prefaces, interviews, forewords, and, in more recent years, podcasts. Midgley speaks clearly and eloquently on many topics to many audiences - a good mark of a 'public intellectual'.

I have included single and co-authored and edited books, journal articles and book chapters, pamphlets, and forewords and prefaces. I also added some selected interviews, videos, and podcasts. I have not included translations, reprints, or reviews. My bibliographical efforts were made much easier by the 'Bibliography of the Works of Mary Midgley' in *The Essential Mary Midgley*, and to the wonderful resource that is Google Books. Any additions or corrections will be gladly received. Asterixed items were published under the name Mary Scrutton.
